- NARRATOR 1: We're the Green Machine Team and we've got a plan.  
It's time for all of us to take a stand.
- NARRATOR 2: The earth right now isn't looking very good.  
There are too many people who aren't doing what they should.
- NARRATOR 3: We're the Green Machine Team and we've got the power;  
we'll teach you what you need to know in less than one half-hour.
- NARRATOR 4: Let's begin with recycling and you will find it's true,  
there are many benefits that it will bring to you.
- NARRATOR 5: Well, here are two facts I bet you didn't know:  
It doesn't take much effort to keep us on the go.

*Student holds up a sign: "Whiz Kid Time: Are you smarter than a \_\_\_\_\_ grader?"\**

*Whiz Kid #1 steps forward and holds up an aluminum can.*

WHIZ KID #1: The energy savings from recycling **just one** aluminum can saves enough electrical power to run a small TV for 3 hours.

*Whiz Kid #2 steps forward and holds up a glass bottle.*

WHIZ KID #2: Recycling **just one** glass bottle saves enough energy to power a lap-top computer for twenty-five minutes.

\*Fill in the grade level that is performing in the blank space on your sign.
